

# PRIME ADHERE

— A high performance, single component, polyacrylic sealer ideal for roofing & negative side repairs —

## PRODUCT DESCRIPTION:

**Prime Adhere** is a unique gunnable sealant that works under demanding conditions where other sealants fail. In damp conditions where oil or water may be present, **Prime Adhere** will grip to the surface and retain its hold. The specialized formulation of **Prime Adhere** makes it the perfect choice for sealing metal roofs and siding. **Prime Adhere** is designed to handle situations where movement and temperature variations are major factors. **Prime Adhere** is an excellent option for the permanent air-tight bonding of vapor barrier sheets used in roofing applications.

## BENEFITS:

- Environmentally friendly • Low V.O.C. content (219 g/l) • Paintable one hour after application • Weather resistant • Long-lasting • U.V. resistant • Adheres to non-porous & damp substrates • Bitumen compatible • Contains no toluene or other petroleum distillates

## WHERE TO USE:

- New & old concrete • Most masonry surfaces • Brickwork • Plaster • Gypsum • Anodized aluminum • Hard PVC • Heating & air conditioning ducts • Flashings • Plastic pipes
- Metal roofs • Metal siding • RVs • Manufactured homes
