

PRIME COLORS-AX

— Premium-quality pigmented silicone sealant available in colors to match your every need —

PRODUCT DESCRIPTION:

Turn to **Prime Colors-AX** pigmented silicone sealants to create countless options for bringing color to your living and work environments. Choose from 30 standard colors of pigmented silicone sealants to match our **Prime Gemstone** line of colored reactive stains for indoor and outdoor concrete and **Prime Gourmet** line of colored cementitious dyes for indoor concrete. For more demanding applications, nearly 500 other colors available on a special-order basis.

Prime Acetoxy-based Sealants: **Prime Colors-AX** sealants are elastic, neutral-curing, one-component silicone sealants (acetoxy cross-linking) ideal for sealing joints with a maximum movement capacity of 25 percent. **Prime Colors-AX** sealants comply with requirements of ISO 1160 and are suitable for sealing joints and connecting joints in sanitary, glass, window and metal construction applications. They are also suitable for use with concrete and similar cementitious materials.
